Model	QQ 7110	Trouble Category	Electrical
Road Mileage	70,000 KM		

Possible Trouble(s):

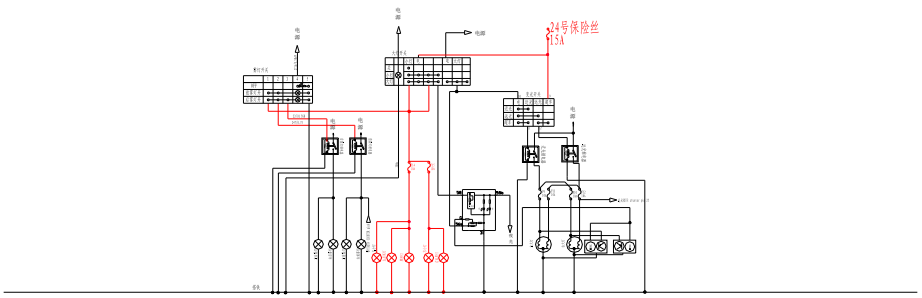
All clearance lights not light but the headlamps normal.

Trouble Analysis:

The fuse directly related to the trouble isn¡t broken. It doesn¡t mean that the system has no trouble. Check the electric circuit diagram and find that the clearance light¡s positive wire and the brake lamp¡s positive wire are the same power line. All components on this vehicle are interconnected. They shall be checked carefully and completely.

Troubleshooting:

On the basis of the electric circuit diagram, check the passing lamp and brake lamp, and find that they don¡t light and the brake lamp fuse is also damaged. 24# Fuse



Final Measure(s):

Replace the brake lamp fuse.
